8 viral reel scripts
that stop the scroll in one second.

9 to 14 seconds each. Every script follows the same 9-step viral structure, written to feel raw, real and curious, not like an advert.

`Hook` `Pattern interrupt` `Curiosity loop` `Visual story` `Retention` `Emotion` `Payoff` `Share moment` `Repeatable format`

How to use this file: film the shots in the "What to record" column, record the voice lines, put the TEXT lines on screen as big captions, and post with the caption at the bottom of each script. Every reel ends on the same card: journzey is coming soon · Follow for launch day 🔔

Why the last reels lost people at second 3

- **The hook started too late.** Frame 1 must already be moving and already have text on it. No logo, no "hey guys", no slow zoom.
- **The hook explained instead of opening a question.** The first line should make them think "wait, what?", not "okay, I get it".
- **The first cut came after 2+ seconds.** Cut, or change something on screen, every 0.8–1.5 seconds.
- **The payoff was guessable.** If they can predict the ending, they leave. Hold the answer until the last 2 seconds.

Hook rules (the first second)

- On-screen text is **6 words or fewer**, big, in the centre of the top third.
- **Something moves in frame 1:** a thumb, a number or a hard cut.
- **Voice and text say the same thing.** Many people watch muted.
- Use one hook type: **contradiction, direct accusation, a question they can answer, a forbidden instruction, or a POV**.

The 9-step structure

1. **Hook**
   Stops the scroll in frame 1
2. **Pattern interrupt**
   Breaks what viewers expect
3. **Curiosity loop**
   Gives a reason to stay
4. **Visual story**
   Shows instead of tells
5. **Retention**
   No boring second
6. **Emotion**
   Makes them feel something
7. **Payoff**
   Rewards their attention
8. **Share moment**
   A moment worth sending
9. **Repeatable format**
   A structure you can repeat

The 8 scripts

#	REEL	FORMAT	LENGTH
1	**"Don't send this to your trading friend."**	Reverse psychology + share trigger	11s
2	**"You were about to skip this."**	Meta pattern interrupt	12s
3	**"Guess which trade lost the most."**	Game + comments	13s
4	**"POV: your trading account can text you."**	iMessage chat (read in real time)	13s
5	**"Every blown account has one moment."**	Reverse playback	12s
6	**"Things traders will never say out loud."**	Dark list → safe place	14s
7	**"Rate this trader, 1 to 10."**	Expectation flip	10s
8	**"This video never ends." (loop)**	Seamless loop	9s

Honesty: any trade numbers on screen must carry a small "Demo account" label. The lines in reel 6 are relatable writing, not quotes from real users, so never present them as testimonials. The comment bubbles in reel 7 are graphics, not real comments.

"Don't send this to your trading friend."

Formats to recreate again and again

Keep the structure, swap the topic. Post one format, check in Insights which one keeps people past second 3, then make 3 more in that format.

FORMAT	STRUCTURE	NEXT VERSIONS
Don't send this	Forbidden instruction → callout → payoff → "okay, send it"	"Don't show this to your wife" · "Don't watch this before market open"
Guess which	3 choices → comment → reveal → lesson	"Guess which session lost the most" · "Guess which emotion"
POV chat	An object texts you → funny → punch	Your stop loss texts you · your strategy texts you
Rewind	End state → rewind → freeze on the moment	The day before a prop-firm fail · the trade before a streak broke
Never say out loud	Dark list → hardest line → safe place	"Things your trading group never posts"
Rate this	Show the result → crowd reacts → hidden cost	Rate this win rate · rate this strategy
Loop	Rhythmic repetition → break	"Buy. Hope. Pray. Close."

Post these first

- **Reel 4 (POV chat)**: people read it in real time, so it holds attention longest.
- **Reel 1 (Don't send this)**: the easiest one to share.
