journzey

10 reel scripts
built to be watched to the end.

Pre-launch content plan. Each reel is 30–40 seconds and follows the same structure: hook → super hook → body → re-hook → body → value → solution with a hook → call to action.

`Hook` `Super hook` `Body` `Re-hook` `Body 2` `Value` `Solution + hook` `CTA`

How to use this file: film the shots in the "What to record" column, record the voiceover line by line, add the on-screen text as big captions, and post with the caption at the bottom of each script.

How Instagram decides what to push

- **Watch time and completion.** The share of people who watch to the end (and rewatch) matters most. That's why every script has a re-hook at 12–15s and an open question that's only answered in the "solution" part.
- **Sends (shares by DM).** Instagram has said sends are one of the strongest signals for reaching non-followers. Scripts 3, 4 and 7 are built to be sent ("send this to a friend who…").
- **Saves.** Useful maths and step lists (scripts 2, 3, 7, 9) get saved, which tells Instagram the reel has lasting value.
- **Comments, especially early ones.** Every CTA asks a one-word or easy question (TILT, YES/NO, your prop firm). Reply to every comment in the first hour.
- **The first 2 seconds.** Instagram tests every reel on a small group first. If they swipe away in 2 seconds, it stops there. Every hook starts on movement plus big text, with no intro and no logo.
- **Originality.** Film your own footage. No TikTok watermarks, no reposted clips.
- **Keywords.** Instagram search reads captions and on-screen text, so say "trading journal", "revenge trading", "prop firm" out loud and write them in the caption.
- **Trial reels:** Instagram can show a reel to non-followers first. Use it to test two hooks of the same script.

Which journzey features each reel shows

#	REEL	FEATURE
01	**"This app stopped my revenge trade"**	Tilt alert + cooldown (Home Hub)
02	**"You have a danger hour"**	Edge Matrix: best window & anti-window
03	**"What are the chances you blow your account?"**	Blow-up probability radar (Edge Matrix)
04	**"This P&L screenshot is fake"**	Public verified P&L link
05	**"Prop challenges fail on rules, not trades"**	Prop firm account with rule presets + live progress
06	**"Log a trade in 4 taps"**	Quick Log + price scroller + needs-details reminder
07	**"Same lot size, 5× the risk"**	Risk / position-size calculator
08	**"My journal messages me every Monday"**	Weekly brief (Monday & Tuesday mornings)
09	**"Moving your stop loss has a price"**	Edge Matrix: last-month audit ("Keep doing" / "Cut out")
10	**"I'm posting my worst trading day"**	Daily flex card (P&L, emotions, rules, "Verified by journzey" QR)

Posting plan

- **3–4 reels a week**, plus 1–2 carousels (Edge Notes) in between. Suggested order: 1, 2, 4, 6, 3, 5, 9, 7, 8, 10. Then repeat 8 ("Monday brief") every Monday as a series.
- **Time:** 7–9 am or 7–9 pm in your audience's time zone, outside busy market hours.
- **Length 30–40s:** long enough for value, short enough to finish. Cut anything that doesn't move the story.
- **Pinned comment:** pin your own answer to the CTA question right after posting.
- **Pre-launch call to action:** "follow for launch" or "DM EARLY". Don't say "free" or "link in bio" until the site is live.

What to record: filming guide

Shot types used in the scripts

FACE	You talking to the camera. Phone on a tripod at eye level, rear camera, 1080p or 4K at 30 fps, window light in front of you (not behind). Frame from chest up, eyes in the top third.
DESK	B-roll of your setup: wide shot of the monitors, hands on keyboard and mouse, close-up of eyes, clicking Buy, standing up and walking away, coffee, notebook, sticky note on the monitor, clock, night lamp. Film each one 5–10 seconds, slowly, a few times.
SCREEN	Real screen recording of the app, not the monitor filmed with a phone. Windows: Win + Alt + R (Xbox Game Bar) or OBS. Mac: Cmd + Shift + 5. Browser zoom 125–150% so text is readable on a phone. Close other tabs and hide your email and real balances.
TEXT CARD	Black or brand-light screen with one bold line, 1–2 seconds, with a short sound ("boom", "whoosh", record scratch). This is the re-hook that resets attention.

Film these once and reuse them in every reel

- Tilt alert popping up (Home Hub), several takes.
- Quick Log done in 4 taps on desktop, plus the price wheel scrolled with your finger on a phone.
- Edge Matrix scroll: best window, anti-window, last-month audit, blow-up radar.
- Dashboard charts drawing in, calendar month view, the daily flex card, the public verified P&L page.
- Prop account: Add account → Prop firm → preset → progress bars.
- Risk calculator: typing a stop and the lot size appearing.
- Weekly brief popup (Monday morning).
- A wide "hero" shot of your desk at night: your signature opening and ending shot.

Audio and editing checklist

- Use a clip-on mic if possible; otherwise record the voiceover in a quiet, soft room with the phone 15–20 cm from your mouth. Don't read; say each line, then look away.
- Change the shot every 2–3 seconds. Cut on the beat of quiet background music.
- Word-by-word captions in the middle of the screen (CapCut → Auto captions), with the on-screen text from the scripts on top.
- Sound effects on the hook, the re-hook and the solution moment. Silence for half a second before the re-hook works too.
- Export 1080×1920, 30 fps, loudness around –14 LUFS. Finish on a frame that loops back to the first shot.

Honesty rules (protect the "verified" brand)

- Lines in **[brackets]** must be your real numbers or story. If something didn't happen to you, change the line or skip the reel.
- Screenshots from the demo journal must show **"sample data"** on screen.
- The app **warns** before a revenge trade; it doesn't block trades at the broker. Never promise profits.

"This app stopped my revenge trade"

REEL 01 · 30–40s

FEATURE: TILT ALERT + COOLDOWN (HOME HUB)

WHY INSTAGRAM WILL PUSH IT

Very relatable pain, so people comment the keyword and send it to trading friends. The red alert at second 0 stops the scroll.

PART	VOICEOVER	ON-SCREEN TEXT	WHAT TO RECORD
Hook 0–2s	"This app just stopped my revenge trade."	It warned me BEFORE	SCREEN: tilt alert popping up on the Home Hub. Add a red flash and a warning sound.
Super hook 2–5s	"And no, it's not a broker setting. It's my journal."	Not my broker. My journal.	FACE: you at the desk, looking into the camera, half-smile.
Body 5–12s	"Two losses in a row. Heart racing. You open a bigger trade to win it back. You know this feeling."	2 losses… 😤	DESK: hand hovering over the mouse, chart full of red, close-up of your eyes.
Re-hook 12–15s	"But here's what nobody tells you…"	Nobody tells you this 👇	TEXT CARD: black screen, white text, a short "boom" sound.
Body 2 15–21s	"Revenge trades have nothing to do with the market. They happen when emotions are running your account."	Emotions ≠ strategy	FACE: talking, then a slow push-in.
Value 21–27s	"So use one rule: after 2 losses in a row, stand up and walk away for 20 minutes. No exceptions."	2 losses = 20-min break	DESK: you standing up, walking out of frame. Text animates in.
Solution + hook 27–34s	"I built journzey to enforce that. After a losing streak it flags tilt risk and starts a cooldown before you trade again."	journzey · tilt alert	SCREEN: tilt alert, then zoom on the cooldown timer.
CTA 34–38s	"Comment TILT if this is you, and follow. It launches soon."	Comment "TILT" 👇	FACE: point down at the comments. End card: journzey · coming soon.

CAPTION

Two losses. Then you size up to "win it back". Sound familiar? 😤

One rule fixed it for me: 2 losses in a row = stand up and walk away for 20 minutes.

I'm building journzey to enforce it automatically. Coming soon 🔔

Comment TILT if revenge trading has cost you 👇

PINNED COMMENT

Mine was revenge trading after a red morning 😅 What triggers yours?

RE-HOOK REMINDER

Add a sound or a hard cut at 12s, and hold the solution shot (27–34s) with a zoom so it feels like the payoff.

"You have a danger hour"

REEL 02 · 30–40s

FEATURE: EDGE MATRIX: BEST WINDOW & ANTI-WINDOW

WHY INSTAGRAM WILL PUSH IT

Curiosity hook ("which hour?") plus a 3-step method people save. It ties in with the danger-hour carousel, so the reel and the post support each other.

PART	VOICEOVER	ON-SCREEN TEXT	WHAT TO RECORD
Hook 0–2s	"There's one hour of the day that's eating your profits."	You have a DANGER HOUR	SCREEN: candlestick chart with the red "danger hour" band (from your post), zooming in.
Super hook 2–5s	"And I bet you don't know which one."	Which one is yours? 👀	FACE: raised eyebrow, lean in.
Body 5–12s	"I split my trades by the hour I entered. Mornings: green. But one hour [say your real hour]? Red. Almost every week."	[your hour] = 🟥	SCREEN: your P&L-by-hour view, or the table from the post.
Re-hook 12–15s	"The worst part?"	The worst part…	TEXT CARD + a short sound stop.
Body 2 15–21s	"I was trading MORE in that hour, not less. Boredom, volatility, revenge. All in one hour."	I traded MORE there	DESK: clock on the wall or phone, then hands clicking fast.
Value 21–27s	"Find yours: 2 weeks of writing down entry times, add up P&L for each hour, then cut your size in the worst one."	1. Log times 2. Add P&L 3. Cut size	TEXT: the 3 steps pop in one by one (or use page 2 of the carousel).
Solution + hook 27–34s	"Or let journzey find it for you. Edge Matrix shows your best window and your anti-window from your own trades."	journzey · Edge Matrix	SCREEN: Edge Matrix scrolling to Best window and Anti-window.
CTA 34–38s	"Save this for your weekly review. What's your worst hour? Comment it."	Save 🔖 + comment your hour	FACE: point at the save button. End card.

CAPTION

Every trader has one hour that quietly eats their profits 🕐

Find yours in 3 steps:
1. Note entry time + result for 2 weeks
2. Add up P&L per hour
3. Cut your size in the worst hour

journzey finds it for you automatically. Coming soon 🔔

What's your worst hour? 👇

PINNED COMMENT

Mine was right after lunch 🫠 Yours?

RE-HOOK REMINDER

Add a sound or a hard cut at 12s, and hold the solution shot (27–34s) with a zoom so it feels like the payoff.

"What are the chances you blow your account?"

REEL 03 · 30–40s

FEATURE: BLOW-UP PROBABILITY RADAR (EDGE MATRIX)

WHY INSTAGRAM WILL PUSH IT

Fear plus a number hooks people. The risk maths is shareable value ("send this to your friend who risks 5%").

PART	VOICEOVER	ON-SCREEN TEXT	WHAT TO RECORD
Hook 0–2s	"What's the chance you blow your account in the next 14 days?"	Chance you blow up: ??%	SCREEN: radar animating, number hidden behind a blur.
Super hook 2–5s	"My journal calculates it. Mine scared me."	Mine scared me 😬	FACE: serious face. Only say "scared me" if it really did.
Body 5–12s	"Win rate, average R, risk per trade, drawdown. Most traders never put these four together."	Win rate · R · risk · drawdown	SCREEN: dashboard stats strip, quick zooms on each number.
Re-hook 12–15s	"And here's the thing: even a good win rate won't save you…"	Even 60% win rate won't save you	TEXT CARD.
Body 2 15–21s	"…if you risk too much. At 5% per trade, 6 losses in a row cuts your account by about 26%."	5% risk × 6 losses = −26%	TEXT: a balance bar shrinking from 100% to 74%.
Value 21–27s	"At 1% risk, the same 6 losses cost you about 6%. That's how you survive a bad week."	1% risk × 6 losses = −6%	TEXT: the same bar barely moving. Green tick.
Solution + hook 27–34s	"journzey's blow-up radar reads your last 30 days and shows your risk of blowing up in the next 14."	journzey · blow-up radar	SCREEN: the radar with your real result (or the demo, labelled "sample data").
CTA 34–38s	"Comment your risk per trade. Be honest. And follow for launch."	Your risk per trade? 👇	FACE + end card.

CAPTION

Even a 60% win rate can blow your account 💥

5% risk × 6 losses in a row ≈ −26%
1% risk × 6 losses in a row ≈ −6%

Same trader. Same losses. Different survival.

journzey calculates your blow-up risk from your own trades. Coming soon 🔔

What do you risk per trade? 👇

#riskmanagement #forextrader #propfirm #daytrading #tradingjournal #tradingtips #journzey

PINNED COMMENT

I keep it at 1% now. Used to be way more 😅

RE-HOOK REMINDER

Add a sound or a hard cut at 12s, and hold the solution shot (27–34s) with a zoom so it feels like the payoff.

"This P&L screenshot is fake"

REEL 04 · 30–40s

FEATURE: PUBLIC VERIFIED P&L LINK

WHY INSTAGRAM WILL PUSH IT

"Fake gurus" is a hot topic in trading, so people share it ("send this to someone who believes every screenshot"). Shares are one of the strongest reach signals.

PART	VOICEOVER	ON-SCREEN TEXT	WHAT TO RECORD
Hook 0–2s	"This P&L screenshot is fake. I made it in 10 seconds."	FAKE. Made in 10 sec.	SCREEN: your own demo page, editing a number with the browser's "inspect element". Never use someone else's account.
Super hook 2–5s	"Anyone can do this, and that's the problem."	Anyone can do this	FACE: shaking head.
Body 5–12s	"Right-click, inspect, change the number. Instant green day."	Right-click → edit → 🤑	SCREEN: slow, clear demo of the edit, red becoming green.
Re-hook 12–15s	"So how do you know if ANY screenshot is real?"	So what's real? 🤔	TEXT CARD.
Body 2 15–21s	"A screenshot is just pixels. A real track record comes from a journal that calculates it live."	Pixels ≠ proof	FACE.
Value 21–27s	"Before you buy anyone's course or signals, ask for a verified track record over months, not a screenshot."	Ask for a verified link	TEXT: a checklist with ✅ verified link · ❌ screenshot.
Solution + hook 27–34s	"That's why journzey has verified P&L links. Calculated live from the journal, so they can't be edited."	journzey · verified P&L	SCREEN: the public P&L page (/p/…) with % return and R, demo data labelled.
CTA 34–38s	"Send this to a friend who believes every screenshot. Follow for launch."	Send to that friend 📤	FACE: point to the share icon. End card.

CAPTION

That green P&L screenshot? Could be 10 seconds of "inspect element" 👀

Before you pay anyone for signals or a course, ask for a verified track record, not a screenshot.

journzey verified P&L links are calculated live from the journal, so they can't be edited. Coming soon 🔔

Send this to a friend who believes every screenshot 📤

"Prop challenges fail on rules, not trades"

REEL 05 · 30–40s

FEATURE: PROP FIRM ACCOUNT WITH RULE PRESETS + LIVE PROGRESS

WHY INSTAGRAM WILL PUSH IT

Prop traders are a huge, very engaged audience. "Comment your prop firm" brings lots of comments, and the trailing-drawdown explainer gets saved.

PART	VOICEOVER	ON-SCREEN TEXT	WHAT TO RECORD
Hook 0–2s	"Most prop challenges aren't failed on bad trades. They're failed on a rule."	Failed on a RULE ❌	SCREEN: "RULE BREACHED" status on the prop dashboard (demo).
Super hook 2–5s	"And the trailing drawdown one gets almost everyone."	Trailing drawdown 💀	FACE: wince.
Body 5–12s	"Daily loss limit. Max drawdown. Minimum trading days. Consistency rule. Four ways to fail with a profitable account."	4 ways to fail	TEXT: 4 cards stacking up.
Re-hook 12–15s	"Here's the one people misunderstand…"	The tricky one 👇	TEXT CARD.
Body 2 15–21s	"With a trailing drawdown, your limit moves UP when your balance hits a new high. So your room shrinks while you're winning."	Limit follows your peak ⬆️	TEXT: a simple line chart with the limit line stepping up under the equity line.
Value 21–27s	"Tip: write your firm's 4 numbers on a sticky note on your monitor: daily loss, max loss, target, minimum days."	📝 4 numbers on your monitor	DESK: you sticking a note on the monitor bezel.
Solution + hook 27–34s	"journzey has prop presets. Pick your challenge and it tracks every rule live, with progress bars and a breach warning."	journzey · prop tracker	SCREEN: Add account → Prop firm → presets → dashboard progress bars.
CTA 34–38s	"Comment your prop firm and I'll make sure its rules are in. Follow for launch."	Your prop firm? 👇	FACE + end card.

CAPTION

You can be profitable AND fail a prop challenge 💀

Daily loss · max drawdown · minimum days · consistency

The tricky one: a trailing drawdown moves up with your peak balance, so your room shrinks while you're winning.

journzey tracks every rule live. Coming soon 🔔

Which prop firm are you with? 👇

Add a sound or a hard cut at 12s, and hold the solution shot (27–34s) with a zoom so it feels like the payoff.

"Log a trade in 4 taps"

REEL 06 · 30–40s

FEATURE: QUICK LOG + PRICE SCROLLER + NEEDS-DETAILS REMINDER

WHY INSTAGRAM WILL PUSH IT

A satisfying product demo (the price wheel spinning) that people rewatch. Rewatches add watch time, and the "how do you journal now?" question brings comments.

PART	VOICEOVER	ON-SCREEN TEXT	WHAT TO RECORD
Hook 0–2s	"Logging a trade in 4 taps. Watch."	4 taps ⏱️	SCREEN: Quick Log done start to finish in real time, sped up 1.5×.
Super hook 2–5s	"Because if journaling takes 5 minutes, you'll stop doing it by Wednesday."	Stopped journaling by Wednesday?	FACE: knowing smile.
Body 5–12s	"Pick the instrument. Buy or sell. Lot size. Then scroll the price like a wheel."	Instrument → side → lots → price	SCREEN: close-up of the price wheel scrolling (phone recording of the wheel with your finger).
Re-hook 12–15s	"But speed isn't the best part…"	The best part 👇	TEXT CARD.
Body 2 15–21s	"Date, time and session fill in by themselves. And later it reminds me to add my setup and how I felt."	Auto time + session · reminder 🔔	SCREEN: Trade Log banner "needs details" bell, then click "Complete now".
Value 21–27s	"Journal tip: log within 5 minutes of closing the trade. After that, your memory starts lying to you."	Log within 5 minutes	TEXT + DESK: closing a trade, then picking up the phone.
Solution + hook 27–34s	"That's journzey Quick Log. Fast enough that you actually use it."	journzey · Quick Log	SCREEN: the result card after saving (risk, P&L, R).
CTA 34–38s	"How do you journal right now? Excel, notebook or nothing? Comment."	Excel? Notebook? Nothing? 👇	FACE + end card.

CAPTION

If journaling takes 5 minutes, you'll quit by Wednesday 😅

Instrument → buy/sell → lots → scroll the price. Done. Time and session fill in automatically.

Tip: log within 5 minutes of closing; your memory starts lying after that.

journzey Quick Log is coming soon 🔔

How do you journal now? 👇

#tradingjournal #daytrading #forex #tradingtips #buildinpublic #trader #journzey

PINNED COMMENT

I used Excel for a year. Never again 🙃

Add a sound or a hard cut at 12s, and hold the solution shot (27–34s) with a zoom so it feels like the payoff.

"Same lot size, 5× the risk"

REEL 07 · 30–40s

FEATURE: RISK / POSITION-SIZE CALCULATOR

WHY INSTAGRAM WILL PUSH IT

A surprising fact plus maths people save. Beginners share it with friends. Works without showing much of the app.

PART	VOICEOVER	ON-SCREEN TEXT	WHAT TO RECORD
Hook 0–2s	"You're probably risking way more than you think."	You're risking MORE than you think	FACE: direct, serious.
Super hook 2–5s	"Because 0.5 lots on gold is NOT the same as 0.5 lots on EURUSD."	0.5 gold ≠ 0.5 EURUSD	TEXT: two lot tickets side by side.
Body 5–12s	"Gold: 0.5 lots with a $10 stop risks $500. EURUSD: 0.5 lots with a 20-pip stop risks $100."	Gold: $500 · EURUSD: $100	TEXT: two numbers counting up.
Re-hook 12–15s	"Same lot size…"	Same lot size…	TEXT CARD.
Body 2 15–21s	"…five times the risk. That's how one gold trade wipes a week of forex profits."	5× the risk 😳	DESK: chart of gold moving fast.
Value 21–27s	"Fix: lots = (account × risk %) ÷ (stop distance × value per point). $10,000 at 1% with a $10 gold stop = 0.10 lots."	$10k × 1% ÷ ($10 × $100) = 0.10 lots	TEXT: the formula building step by step.
Solution + hook 27–34s	"journzey's risk calculator does this for every instrument in one second, from your own account size."	journzey · risk calculator	SCREEN: calculator, typing stop distance, lot size appearing.
CTA 34–38s	"Save this before your next trade. Follow for launch."	Save before your next trade 🔖	FACE + end card.

CAPTION

0.5 lots on gold ≠ 0.5 lots on EURUSD 😳

Gold, $10 stop → $500 risk
EURUSD, 20-pip stop → $100 risk

Lot size should come from your stop, not your mood:
lots = (account × risk%) ÷ (stop × value per point)

journzey calculates it for every instrument. Coming soon 🔔

"My journal messages me every Monday"

REEL 08 · 30–40s

FEATURE: WEEKLY BRIEF (MONDAY & TUESDAY MORNINGS)

WHY INSTAGRAM WILL PUSH IT

Personal and a bit vulnerable ("it said something I didn't want to hear"), which keeps people watching. Easy to repeat every week as a series.

PART	VOICEOVER	ON-SCREEN TEXT	WHAT TO RECORD
Hook 0–2s	"Every Monday my trading journal sends me a message."	My journal texts me 📩	SCREEN: the weekly brief popping up on the Home Hub.
Super hook 2–5s	"And it doesn't sugar-coat anything."	No sugar-coating	FACE: nervous laugh.
Body 5–12s	"Last week's result, then three don'ts and three do's, all from my own trades."	3 don'ts · 3 do's	SCREEN: scroll through the brief slowly.
Re-hook 12–15s	"This week it said something I really didn't want to hear…"	It said THIS 👇	TEXT CARD.
Body 2 15–21s	"[Read one real line from your brief, e.g. a don't about an hour, instrument or habit.]"	[your real line]	SCREEN: zoom on that exact line.
Value 21–27s	"Do this even without an app: every Sunday, 10 minutes. Best trade, worst trade, one rule for next week."	Sunday: best · worst · 1 rule	DESK: notebook, pen, coffee, 10-minute timer.
Solution + hook 27–34s	"journzey writes this review for you every Monday, so you start the week with a plan, not a hope."	journzey · weekly brief	SCREEN: the brief again, then the Home Hub.
CTA 34–38s	"Follow. I'll share what it tells me every week."	Follow for next Monday 🔔	FACE + end card. Turn this into a weekly series.

CAPTION

Every Monday my trading journal tells me the truth 📩

Last week's result + 3 don'ts + 3 do's, from my own trades.

No app? Do it yourself every Sunday: best trade, worst trade, one rule for next week.

journzey is coming soon 🔔
Follow for next Monday's brief.

"Moving your stop loss has a price"

REEL 09 · 30–40s

FEATURE: EDGE MATRIX: LAST-MONTH AUDIT ("KEEP DOING" / "CUT OUT")

WHY INSTAGRAM WILL PUSH IT

A confession question ("YES or NO") gets very easy comments. The R maths is saveable value.

PART	VOICEOVER	ON-SCREEN TEXT	WHAT TO RECORD
Hook 0–2s	"Moving your stop loss is costing you more than bad entries."	Moving your stop = 💸	SCREEN: dragging a stop loss further away on a chart.
Super hook 2–5s	"My journal put an exact price on it."	It put a PRICE on it	SCREEN: Edge Matrix "Cut out: Moving stop loss" chip (your number, or the demo labelled "sample data").
Body 5–12s	"You move it 'just a bit'. Sometimes price comes back. When it doesn't, a 1R loss becomes 2R or 3R."	1R → 3R 📉	DESK: frustrated hand off the mouse.
Re-hook 12–15s	"Here's the maths that changed my mind."	The maths 👇	TEXT CARD.
Body 2 15–21s	"Win half your trades at 2R and lose 1R: you make half an R per trade. Let your losses grow to 2R and you make zero."	+0.5R → 0R	TEXT: two equity lines, one rising, one flat.
Value 21–27s	"Rule: a stop can only move toward profit, never away. Ever."	Stops move ONE way ➡️	TEXT + FACE.
Solution + hook 27–34s	"journzey's monthly audit shows what to keep doing and what to cut out, with the exact amount each habit cost you."	journzey · monthly audit	SCREEN: Last month audit, Keep doing / Cut out rows.
CTA 34–38s	"Be honest: do you move your stop? Comment YES or NO."	YES or NO? 👇	FACE + end card.

CAPTION

Moving your stop "just a bit" has a price 💸

Win 50% at 2R, lose 1R → +0.5R per trade
Let losses grow to 2R → 0R

Rule: stops only move toward profit. Never away.

journzey shows exactly what each habit costs you.
Coming soon 🔔

Do you move your stop? YES or NO 👇

"I'm posting my worst trading day"

REEL 10 · 30–40s

FEATURE: DAILY FLEX CARD (P&L, EMOTIONS, RULES, "VERIFIED BY JOURNZEY" QR)

WHY INSTAGRAM WILL PUSH IT

Honesty stands out against fake-profit content, so people trust and follow you. Others relate and share their own red days.

PART	VOICEOVER	ON-SCREEN TEXT	WHAT TO RECORD
Hook 0–2s	"I'm posting my worst trading day."	My WORST day 🟥	SCREEN: your real red flex card sliding in. Only post a real day.
Super hook 2–5s	"Because hiding losses is exactly why most traders never improve."	Hiding losses = no growth	FACE: calm, honest.
Body 5–12s	"[Tell the real story in one line: what happened and what you did.]"	[your story]	DESK: replay of the chart from that day, if you have it.
Re-hook 12–15s	"But the money isn't the number that hurt most…"	This number hurt more 👇	TEXT CARD.
Body 2 15–21s	"Rules followed: [your real number]. I broke my own rules. That's the real loss."	Rules followed: [x/y]	SCREEN: zoom on the rules / emotions line of the card.
Value 21–27s	"Judge your day by rules followed, not by P&L. A red day with every rule followed is a good day."	Rules > P&L	TEXT.
Solution + hook 27–34s	"journzey makes this card at the end of each day: P&L, emotions, rules, and a QR code that proves it's real."	journzey · verified daily card	SCREEN: the card with the QR code, then the "Verified by journzey" badge.
CTA 34–38s	"Post your worst day too. Tag me. Let's normalise honest trading. Follow for launch."	Post yours. Tag me 🤝	FACE + end card.

CAPTION

Posting my worst trading day. On purpose. 🟥

The money hurt, but breaking my own rules hurt more.

Judge your day by rules followed, not P&L.

journzey makes a verified daily card at the end of each day, wins AND losses. Coming soon 🔔

Post your worst day and tag me. Let's normalise honest trading 🤝

PINNED COMMENT

Red days teach more than green ones. Agree? 👇

RE-HOOK REMINDER

Add a sound or a hard cut at 12s, and hold the solution shot (27–34s) with a zoom so it feels like the payoff.
